A vociferous member of this group Dr. [Wayne West Wayne West](#), chairman of the group that protested against the US president during his visit. Dr. West continues to alienate LGBT youths through his facetious unscientific claims.

" West regularly uses his medical credentials to make largely unfounded allegations about the link between homosexuality and HIV. For example, in his sworn affidavit in the aborted case challenging Jamaica's anti-sodomy law, West claimed that homosexuality is "inherently infectious" and would lead to HIV.

When I publicly challenged him on this blatant fallacy (among other things, non-infectious gay men cannot transmit HIV to each other) West admitted his error and amended his affidavit. However, he was only willing to concede what the science has already declared, namely, men who have sex with men (MSM) are overwhelmingly vulnerable to HIV. What West failed to acknowledge is what the HIV community has also known for some time, which is that homophobia, supported by anti-gay laws, contribute to

the vulnerability of MSM by driving them away from effective anti-HIV interventions".

## Jamaican doctor says criminalizing LGBTI helps them

The fundamentalist Christian group, Jamaica Coalition for a Healthy Society (JCHS), is one of the island's most strident campaigners against LGBTI human rights. The organization's Chairman and...

**Wayne West** For the record the quote above ascribed to me is untrue. My position re the buggery law and HIV among Men who have Sex with Men (MSM) is that " the law is neither necessary nor sufficient to reduce HIV among MSM". Change in behaviour is what is required. Buggery does not cause one to be infected with HIV but there is a high statistical correlation between the practise of buggery by MSM and the risk of HIV infection . There is a difference between cause and association. Public policy is informed not only by cause but also by statistical association. I believe that the buggery law should be retained because the law is also a teacher and decriminalising buggery or repealing the law sends the wrong message . Removing the law indicates that the society accepts creeping moral nihilism and sexual anarchy as its norms . Also the presence of the buggery helps to define the type of society the country wishes to have. Countries which have removed their buggery laws are indicating that for them creeping moral nihilism and sexual anarchy are now their norms for behaviour.

I am happy Ms. Hanna has an appreciation that Obama has an appreciation that young people are the future.  
The question remains, does Ms. Hanna herself get it?  
When will she or the Prime Minister address the many "Waste" youths in Jamaica.  
Bleaching, tattooed , scamming, pants worn around the ankles, bartender and gogo stripper dancers and prostitution providing the most work for our young women or scamming for our young men!!!  
When will Any One of our Leaders seek to turn this rising tide?

## How migrants control one of the world's most powerful economic engines

Migrants sent \$436 billion in remittances in 2014, far more than what the world's wealthiest nations sent developing countries.

PBS.ORG

**Trevor Dawes** Howard, the 'slow death of developed nations' isn't coming so much from migrant laborers sending money back home to their countries of citizenship but more from capital flight and tax avoidance from rich individuals and businesses in these developed countries.  
2 hrs · Like · 1

**Howard Collash** Money being sent home by migrants is also considered capital flight. In many cases migrant workers do not pay taxes on wages earned, so this is also view as tax avoidance.  
1 hr · Like

**Trevor Dawes** Howard, in the overall scheme of things, migrant laborers sending home \$438 billion in remittances pales next to the \$2.6 to \$3 trillion that businesses and rich individuals have stashed away that no taxes are collected on.
